

TAPE-IN HAIR EXTENSIONS REMOVAL INSTRUCTIONS

IMPORTANT:

To avoid damaging the hair and the NINFAS Tape-In Hair Extensions, the removal of extensions must be performed by a professional stylist.

REMOVAL STEPS:

1. Use only NINFAS Tape-In Removal Solution to remove the extensions.
2. Section the hair as you did in the application instructions, but starting from the top to the bottom.
3. Apply a few drops of NINFAS Tape-In Removal Solution to the adhesive pad.
4. Allow the solution to penetrate the adhesive pad.
5. Gently massage the pads until you feel them getting wet.
6. Wait several minutes and slowly separate the two adhesive pads.
NOTE: Never force the adhesive pads apart. If the adhesive pads do not separate easily, apply another drop of NINFAS Tape-IN Removal Solution and wait a few more minutes.
7. Repeat steps 2-6 until all extensions are removed.
8. Shampoo thoroughly with a clarifying shampoo to remove any residue and Tape-In Removal Solution.
9. Dry and style as usual or re-apply NINFAS Tape-In Hair Extensions.
